FOR THE ONES IN CONTROL.

Forge is smart.

In fact it's one of the smartest buildings around. Using the Smart Spaces app Forge puts occupiers first, using the latest IoT technology. It collects all available data within the building to provide 360° control, automation and real time operational feedback.

Sustainability

Sustainability is encouraged by real-time system feedback/ demand prediction to deliver cost savings and an eco friendly workspace.

Climate

Using predictive technology based on trends within data from the air conditioning system the app realises when you are arriving at the building – altering the climate to match your preferred settings.

Lighting

The app communicates with the lighting system as you are on the way to work, automatically arranging the LUX intensity to your preferred setting based on what you have previously used.

Access Control

A key fob is a thing of the past at Forge. The app controls all access for you and your visitors. It even allows you to communicate with your visitors when they've arrived.

Community/Concierge

Keep up-to-date with community events for tenants – book out spaces within the building via the booking system – or use our concierge to make your restaurant reservations.
